The value of OZONE as a natural preserver has

Anown to our abler chemists for years, but, until now, no means of producing it in a practical, inexpensive, and simple manner have been discovered. Microscopic observations prove that decay is due to septic matter or minute rerms, that develop and feed upon animal and vegetable structures. OZONE, applied by the Prentiss method, serzes and destroys these germs at once, and thus preserved by this process, and every visitor is welcome to come in, taste, smell, take away with him, and test in every way the merrits of OZONE as a preservative. We will preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender, for him to keep and test.

EDECU AME ATO Such as beef, mutton, DILTICA after being treated by this process.

CZONE as a preservative. We will preserve, free of charge, any article that is brought or sent prepaid to us, and return it to the sender, for him to keep and test.

FRESH MEATS such as beef, mutton, game, fish, &c., preserved by this method, can be shipped to Europe, subjected to atmospheric changes, and return to this country in a state of perfect preservation.

EGGS can be treated at a coet of less than one tin an ordinary room six months or more, thoroughly preserved; the yolk held in its normal condition, and the eggs as fresh and perfect as on the day they were treated, and will sell as "strictly choice." The advantage in preserving eggs is readily seen; there are seasons when they can be bought for 8 or 10 cents a dozen, and by holding them, can be sold for an advance of i from one hundred to three hundred per cent. One man, with this method, can preserve 5,000 dozen a day.

FRUITS may be permitted to ripen in their borted to any part of the world.

The juice expressed from fruits can be held for an indefinite period without fermentation—hence the great value of this process for producing a temperance beverage. Citer can be held perfectly aweet for any length of time.

VEGETABLES can be kept for an indefinite series of any length of time.
